

Image Processing and Vision Project Report Format

1. Cover Page

(Project Title, Course Title, Student Details (rollno, Name, Semester), Dept. College, Academic Year)

2. Abstract

- Problem
- Method
- Key Results
- Applications

3. Introduction

- Clearly define the problem with the background
- Explain motivation and relevance (importance in IPV)
- State objectives

4. Literature Review (if any)

- 2–4 related works
- Comparison with existing approaches
- Research gap identified

5. Methodology & Technical Approach

Explain how your system works

- Description of algorithms used
- Flowchart / block diagram
- Step by step process
- Justification of approach

6. System Design / Architecture

- Input → Processing → Output
- Tools used (Python, OpenCV, MATLAB, etc.)

7. Implementation & Coding

- Description of modules
- Key code snippets / screenshots
- Libraries used

8. Results & Analysis

- Input vs Output images
- Comparisons
- Metrics (Accuracy, PSNR, SSIM, etc.)
- Observations
- Interpretation of results
- Strengths and limitations

9. Innovation / Complexity

- Novel ideas / improvements
- Advanced techniques used

10. Conclusion and Future work

- Summary of work
- Key outcomes
- Improvements
- Extensions

11. References

- IEEE / APA format

Formatting (Apply in Word)

- Font: Times New Roman
- Size: 12 (text), 14 (headings)
- Line spacing: 1.5
- Page numbers
- Figures with captions
